

The new National CAP website address is now online and is being updated with all new information about CAP.

EVERYONE needs to change their bookmarks from the old national cap website to the new one as soon as possible to avoid any confusion. In addition, the old website is still on line, and beginning on 2-15-2009 all those who access the old <http://www.cap.gov/> website will be redirected to the new one at www.gocivilairpatrol.com. That said, it is still recommended that you update your bookmarks to the new web address for National HQ CAP.

The new CAP HW web site is written entirely in Flash, this REQUIRES that you have the Flash Viewer installed. If you do not have the Flash Viewer installed, you can download it (or upgrade to latest version) for free from: <http://get.adobe.com/flashplayer/>

The above link is not displayed on the HQ website and you may have problems depending on your browser settings.
